Source: dim_project / projects_clean.csv, sorted by (actual_cost - budget) descending. • Chart: a table reads better than a bar chart for 10 named projects x 4 numeric fields each. • Insight: every one of the top 10 over-budget projects shares an identical AED 2,000,000 budget — a fixed-budget template that consistently under-estimates cost by 13-19%.

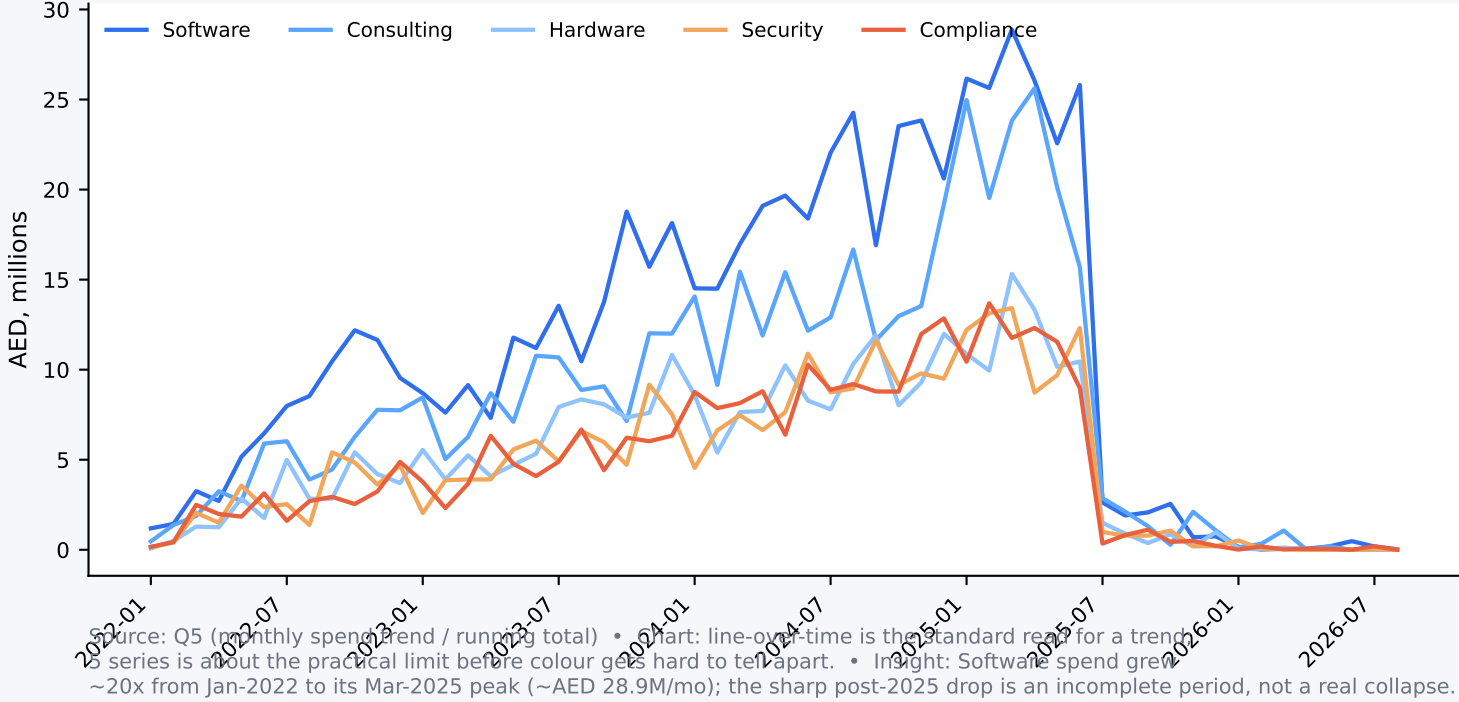

50,000

TOTAL TRANSACTIONS

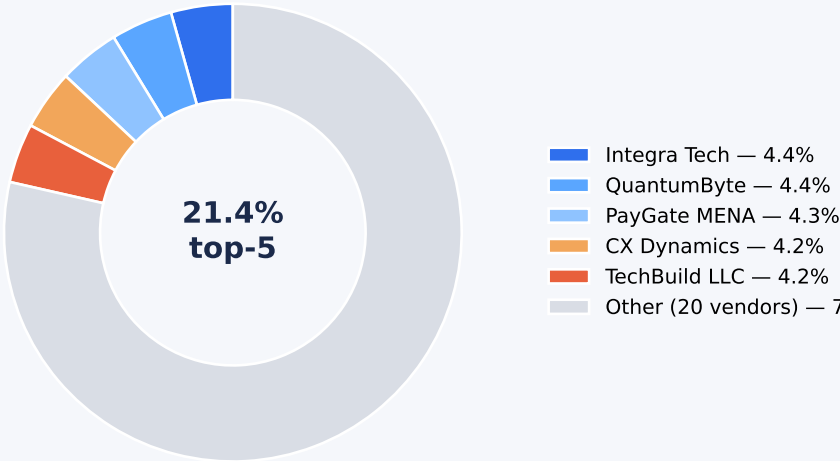

KPI CARDS

Why cards: a single glanceable number per metric is the fastest read for an executive opening the dashboard cold — no chart interpretation needed.

Monthly Transaction Spend Trend — Top 5 Categories

Vendor Concentration — Top 5 + Other

Source: Q3 (vendor concentration risk). • Chart: donut suits a part-of-whole read across a small number of slices plus an 'Other' long tail. • Insight: spend is NOT concentrated — the top vendor is only 4.4% of total spend, so no single vendor is a single point of risk.
